

MODERN VERTIGATE

Lift and Fold Gate

The VertiGate is ideal for situations where there is a lack of room to dedicate to a swing or slide system. The VertiGate requires a very small footprint for installation and can be ordered in a wide array of choices of length, color, and picket design. The VertiGate comes with a built-in battery back-up system able to operate over 1000 cycles without power.

- 9 to 18sec. (adjustable) cycle time
- Aluminum and Steel construction
- 12VDC Power System with back-up operation
- Photovoltaic option
- Solid State Electronics
- LED indicators for easy diagnostic
- Built-in radio control
- Built-in loop detector socket
- 18' gate standard length configuration
- Master/Slave configuration for up to 36' coverage
- Manual release for emergencies

GATES & OPERATORS

Specifications:

Voltage:	12VDC
Feed circuit:	120VAC, 40W max.
Max. gate width:	18feet (36' with slave gate)
Lift mech.:	modified ball screw, linear actuator, spring counter balance
Operator dim. (H):	72in.
(W):	12in.
(L):	18in.
Min. pad dim. (W):	12in.
(L):	20in.
Safety:	built-in loop detectors input for photosensor current-sensing backup
Duty cycle:	up to 1000 cycles a day
Speed (up/down):	9-18 sec. configurable

Options:

COLOR

FILIGREE
